

Why does the UI look garbled after a firmware upgrade?

This is typically an issue with web browser caching. Please clear the browser's cache or use the browser's Reload/Refresh button to fix the problem. More information on clearing browser cache is [available here](#). Keep in mind the instructions for your specific browser may vary.

Note that this should not be an issue when updating from [firmware](#) version 2.15 or later.

Please visit kb.egauge.net for the most up-to-date documentation.
